

PREPPING FOR A HOME INSPECTION DOESN'T HAVE TO BE SCIENCE.

•1•

Make sure to clear personal items from around the following areas:

- hot water heaters • electrical panels
- furnaces & heat pumps • crawl space accesses
- attic access hatches or ladders

•2•

Leave a list *OR* plan to discuss with the inspector any appliances, pieces of equipment, or plumbing fixtures that are not functioning properly or may leak when used.

•3•

Make sure all doors have clear access.

•4•

Have the kitchen sink, oven, and dishwasher clear of dishes and/or stored items so they may be tested.

THANK YOU!
